

## Graduate Economist

Frontier Economics is a boutique consulting firm comprised of highly skilled and experienced microeconomists. We provide consulting services to both public and private sector clients across a range of industries including energy, climate change, telecoms, transport, infrastructure, agriculture and financial services.

Making an impact for our clients means understanding their circumstances and critical issues – whether this is the commercial reality of their business, the forces driving customer behaviour, the implications of regulatory decisions, or even the political context. In all cases, we base our advice on sound economic frameworks and pride ourselves on our empirical work, generating results that can withstand even the closest scrutiny. The methods and models we use are often complex, but our advice is always succinct, clear, honest and reliable.

Frontier Economics seeks to grow our existing group of consultants with an energetic, resourceful and self-motivated individual. We highly value individuals who can integrate strong problem-solving abilities and purposeful communication.

**Working as a Graduate Economist at Frontier Economics** will involve:

- working within small teams on projects in a variety of sectors to deliver transparent and well thought out results
- working and solving complex problems using data – whether small, medium or big data!
- writing reports and presentations on findings in line with project deliverables
- leading projects at an early stage of your career
- working with some of the brightest minds in the industry.

**As a Graduate Economist at Frontier Economics** you will receive support and guidance to develop and/or enhance your skills in:

- client and stakeholder engagement
- project management skills
- technical skills such as Python and R to develop suitable and superior analytics models
- report writing and presentation skills to clients
- knowledge of sectors that Frontier Economics advises in.

**The ideal candidate will have:**

- an economics, econometrics, business analytics or related honours or post-graduate degree with strong academic results
- excellent data handling, management and analytical skills
- an eye for detail and a devotion to quality control and self-improvement
- outside-the-box problem solving skills and the ability to work solutions end to end
- strong competency in Microsoft Excel and/or a language such as R or Python
- excellent written and verbal communication and interpersonal skills
- experience in working effectively and positively with clients or relevant stakeholders
- eligibility to work in Australia.
